

Mike Miller

I ship easy to use digital products. End to end. Any stack.

Courier — Notification Orchestration SaaS

June 2022 — Now

Staff Engineer

- Architected and engineered the entire SDK stack to be insanely easy for developers to work with, fast to maintain, and simple to iterate
- Worked across every stack in the company to be useful anywhere needed (backend, frontend, docs, MCP, AWS etc)
- Managed several different small teams across several areas of the company to ship faster

Choice — Retirement Account App

Mar 2021 — June 2022

Product Designer + Senior Engineer

- Redesigned the entire product from scratch to be mobile first, easy to maintain and far more usable
- Made key architecture decisions based on what customers needed. Chose to use Flutter to cover all customer platforms in one codebase.
- Led engineering on an entire redo of the API to be way easier to work with and support real-time functionality
- Shipped fast. Rebuilt everything in 3~4 months. Iterated heavily to improve from there

Ovenbits — Mobile App Agency

Mar 2018 — Mar 2021

Senior Mobile Engineer

- Built tons of from scratch UI/UX for many different brands. Included intuitive gestures, animations, transitions and more
- Worked directly with clients to ensure they could market a product they were proud of
- Shipped insanely fast. Built ~10 brand new, fairly large products in 3 years.

Elevator Up — Web App Agency

Feb 2017 — Dec 2017

Product Designer + Frontend Engineer

- Worked on roommates.com, but did not align with leadership ethics so I left

Sportsman Tracker — Hunting & Fishing App

Nov 2014 — Feb 2017

Product Designer + Mobile Engineer

- Redesigned and engineered the entire mobile app for hunters and fishermen
- Did several iterations of the product design based on metrics and ideal customer
- Configured the stack to export a hunting app and a fishing app from one codebase to ship even faster
- Worked with server-side folks to re-architect the system to be far easier to work with the UX our customers wanted
