Mike Miller

Loves to design and engineer digital products that make people delighted!

Courier

June 2022 — Now

Staff Engineer

Led SDK engineering to build the easiest-to-integrate notification stack for Web, iOS, Android, React Native, and Flutter. Architected and engineered the entire SDK ecosystem for backend kits, Oversaw project planning, conducted code reviews, and ensured technical alignment with strategic business goals. Built new endpoints and an MCP server. Partnered with sales, support, and other engineering teams to help get more users and even made content!

Choice

Mar 2021 — June 2022

Designer + Senior Mobile Engineer

Designed a new mobile-first product based on existing loose branding, current usage metrics, and understanding of the cryptocurrency investment industry. Engineered the mobile app in Flutter to help structure a small, lean team. Hired new talent, led design and mobile engineering, helped refresh the brand, rearchitected the backend, and reorganized areas of customer support and client relations.

Ovenbits

Mar 2018 — Mar 2021

Mobile Engineer

Created apps used by millions of users on iOS and Android! Notable clients included L'Oréal, Hattori Hanzo Shears, YouVersion, and several smaller companies. This role involved extensive custom UX engineering, occasional design work, leading junior teammates, and direct collaboration with clients.

Elevator Up

Feb 2017 — Dec 2017

Designer + Frontend Engineer

Worked on small web projects until I uncovered the company was engaging in unethical activities. Decided to leave afterwards.

Sportsman Tracker

Nov 2014 — Feb 2017

Designer + Mobile Engineer

Redesigned iOS and Android apps based on user metrics and testing insights; fully rewrote the iOS app in Swift and the Android app; drove user growth to over 600,000; and launched a dedicated community for hunters and fishermen.
